

Crimp Coupling

AH Series

APPLICATION

Provides a high strength, low profile coupling for polyethylene gas service pipes, can be used for emergency repair above or below ground and for service insertion inside existing steel services.

DESCRIPTION

Comprising a double ended Crimp mechanical fitting in either size on size or reducing diameter configurations. Heavy duty Zinc coating available for riser applications. For below ground applications fitting must be suitably protected.

Suitable for low and medium pressure installations.

CONSTRUCTION

- Body (1): Steel
- Insulation Washer (2): Engineering plastic
- Crimp Ring (4): Copper – annealed
- Packing Tube (3): Cardboard
- Corrosion protection: Zinc electro plated

INSTALLATION

The Crimp joints should be made using the correct WASK Crimp tool after the fitting has been inserted on to both pipes. Fittings installed below ground must have an approved site corrosion protection system applied after installation and pressure testing.

SPECIFICATION

Meets GIS/PL3:2014 requirements, BSI Kite Mark certified KM587336.

Maximum Operating Pressure (MOP) = 5.5 Bar.
