

WASK CRIMP tools

Crane BS&U has updated the range of CRIMP tools. Based on the operators that are using our tool every day, we have identified how the WASK CRIMP tools can be better and easier to use. We have redesigned the handle to make the tool more comfortable to use when working in tight spaces. By allowing, the handle to move over the screw you can now work more comfortably. We are sending the new tool care & maintenance sheet so you can have further information about it.

New design at the right

This is the list of new part numbers you can use to order your CRIMP tools:

Size	Colour	Parts being replaced	New part numbers
16mm PE80	Brown	BE0021	BE0037
20mm PE80	Green	BE0022	BE0038
25mm PE80	Blue	BE0023	BE0039
32mm PE80	Yellow	BE0024	BE0040

We want to let you know that prices will remain the same for when using the new part numbers. For more information or anything else, you might need, please let us know. You can contact us by your normal channel or in the email and phone numbers at the bottom of this communication.

The new parts will be available from the 11th May 2020.

Finally, we would like to remind you about our range of ratchet spanner operated CRIMP tools. This is indicated for jobs with a large number of CRIMP joints. This reduces the effort needed on each joint, improving the Health & Safety on site.

Size	Ratchet spanner code	Colour
16mm PE80	BE0041	Brown
20mm PE80	BE0042	Green
25mm PE80	BE0043	Blue
32mm PE80	BE0044	Yellow
