OLD TEESET BASES

THE WASK AMNESTY SCHEME ALLOWS YOU TO SWAP YOUR EXISTING BASE, REGARDLESS OF CONDITION OR ORIGIN, FOR ONLY RRP £450 EACH + VAT, WHICH IS HALF THE USUAL RETAIL PRICE!

The WASK MKII base has been designed with many operational & maintenance improvements over the original MKI base including :

Operational improvements

1. Vent lock is a more secure ¼ turn ball valve rather than spring button
2. Vent lock ball valve easier to clean on site than spring button design
3. Integral torque bar mounting fitted to base (no need for separate fitting)
4. Thicker lugs designed into casting increasing strength and durability

Maintenance improvements

1. Rubber O-Ring seal is used rather than Loctite
2. As Loctite is no longer used there is no need to clean this off when servicing or a need to let it cure for 24 hrs
3. Faster to maintain the base
4. Easier to maintain the base
5. Cleaner to maintain the base
